# Cuba Loads Missiles While CIA Blunders

FOIAb3b

Missile bases have been built in Cuba. Guided missiles, furnished by the Soviet Union, are being installed with U.S. cities as targets.

The present crisis which developed during the Eisenhower Administration and ripened three months after Kennedy came to power forces us to fix the blame on all of three situations: Intelligence has broken down, treason is in command, or stupidity is rampant.

Courageous patriotic refugees from Cuba organized to retake their homeland which had been seized by the Moscovite Fidel Castro. They organized with the understanding that they would receive aid from the United States. The result was scandalous, tragic and pitiful. The cream of patriotic leadership was slaughtered on the beaches, or will die before the barbaric firing squads of the Cuban Moscovites. The martyred patriots insisted that help promised them by the United States was not forthcoming.

As the days pass, facts will come out concerning this catastrophic blunder, but enough has happened to make use realize that the intelligence department of our Government did not give the heroic rebels the proper information. If we do not have the proper information concerning what is going on in Cuba, then what about the information which has to do with our entanglements and our responsibilities all over the world?

This helps to explain the U.S. debacle and numerous other bungleings in various areas. Sen. McCarthy when he was investigating appeasement, stupidity and treason inside the Government agencies was forbidden by President Eisenhower to investigate the Central Intelligence Agency.

The Monroe Doctrine has been flouted. America has been embarrassed in the eyes of the entire world. We could not have been smeared worse by the left wing press if we had openly invaded Cuba. Thousands of tons of war materials are coming into Cuba every day and every week from Russia and her satellites.
